Decimal Unit – Lesson 4A: Multiplying Decimals – **HOMEWORK**

** Includes review of other lessons fyi...*

Directions: You must show all your work to receive credit.

1. Early in the morning, Carly set out on a 12.5 mile hike. By lunchtime, she had walked 4.78 miles. How much farther did she have to go?	2. Over the course of the week, Avery ran 3.45 miles, 5 miles, 8.215 miles, and 0.5 miles. What was his total mileage for the week?
3. $-100 - 4.56$	4. $2.35 - 10.09$
5. $30.9 \cdot 7.2$	6. 54×1.25

<p>7. 1.75×22</p>	<p>8. 12.9×17.6</p>
<p>9. 8.86×9.43</p>	<p>10. 12.001×12.5</p>
<p>11. Leigh ordered twenty-two shirts for her classmates. If each shirt cost \$5.75, how much did she spend?</p>	<p>12. Liam has \$100. He ordered three pizzas (\$11.75 each), five bottles of soda (\$2.25 each), and two cakes (\$15.62 each). He gives the delivery guy a tip of \$15. How much money does Liam have left?</p>
